ANNOUNCEMENT

DC/DC Converter Based Auxiliary Battery Charging Solutions

Keeping auxiliary batteries charged is the number one priority to ensure the proper function of the liftgate and hence a successful product delivery.

For over 5 years now, Maxon has partnered with Purkeys to develop innovative charging solutions. One of these solutions is taking advantage of a DC/DC converter that amplifies any input voltage (9 to 14 AMPs) to the correct voltage necessary to charge and maintain liftgate batteries.

The complete system consists of a pre-installed DC/DC converter in the battery box (see picture) and either a Direct™ (connects to a single power source) or Select™ (can switch between multiple power sources) module that controls the system (please see chart below).

Direct™ System Options

Choose a single source to control and extend charge time

DIRECT-01	With Dual Pole Connection
DIRECT-02	With Dual Combo Connection 50' Harness
DIRECT-03	With 7-Way Connection
DIRECT-04	For Reefer Connection or Straight Truck Application

Select™ System Options

Selects the best available from multiple sources to maximize charge time

SELECT-21	With Reefer and Dual Pole Connections
SELECT-24	With Dual Pole and 7-Way Connections
SELECT-25	With Dual Combo and 7-Way Connections
SELECT-32	With Dual Pole Combo, Reefer and 7-Way Connections
