ANNOUNCEMENT

MAXON Product Update: New Dedicated Ground Cable for the Tuk-A-Way® GPT and GPTLR Liftgate Models

The newest versions of the GPT and GPTLR (galvanized standard) will feature bolt-on mount plates. In order to facilitate solid grounding, a dedicated ground cable is now provided with these gates (see parts box). Please review the installation manuals for proper installation of this ground cable.

STEP 5 - CONNECT GROUND CABLE (RECOMMENDED)

NOTE: To ensure power unit is correctly grounded, MAXON recommends connecting 2 gauge ground cable from grounding connection on pump mounting plate to a grounding point on the frame, or negative battery terminal in the optional battery box.

1. Unbolt pump ground cable from the pump mounting bracket. Then, bolt and tighten pump ground cable and external ground cable (parts box) to mounting bracket (FIG. 36-1).

CONNECTING EXTERNAL GROUND CABLE
FIG. 36-1
