SmartSpace

Maxon has added a gap (SmartSpace) between the liftgate and the extension plate. This feature makes liftgates more efficient and safe to use.

Bolt-On Extension Plate and Steps

Bolting on the extension plate and steps, versus the current practice of welding, has two crucial advantages: it overcomes corrosion issues - induced by welding and repainting and it simplifies installation.

Aluminum Platform MAX GRIP® OPTIONAL

Lightweight aluminum platform design with recessed hinges provides a flat loading surface over entire width of platform. The platform features dual assist torsion springs that minimize the opening and closing force. Optional available with knurled surface (MAX GRIP®).

Max On-Lok®

By special order request (SOR) all GPTs can be ordered with the Max On-Lok® kit which makes them compatible with the most common vehicle dock restraint systems.

MAXPRO® Paint or GALVANIZED Finish

This patented, Maxon exclusive paint process has a tough polyurea top coat and an AL rich primer that combat corrosion and keep the liftgate looking like new. For even more corrosion protection, the GPTWR is also available in a galvanized finish.
